<sup>1</sup> Gross Merchandise Value (GMV) is a non-GAAP operating metric. See “Non-GAAP Financial Measures and Key Operating Metrics” for additional information regarding this metric.

<sup>2</sup> Non-GAAP Gross profit and Non-GAAP gross margin are non-GAAP financial measures. See “Non-GAAP Financial Measures and Key Operating Metrics” for additional information regarding this metric.

<sup>3</sup> Adjusted EBITDA is a non-GAAP financial measure. See “Non-GAAP Financial Measures” for additional information regarding this metric, including the reconciliations to Operating Profit (Loss), its most directly comparable GAAP financial measure. The Company is unable to provide a reconciliation of Adjusted EBITDA to Operating Profit (Loss), its most directly comparable GAAP financial measure, on a forward-looking basis without unreasonable effort because items that impact this GAAP financial measure are not within the Company’s control and/or cannot be reasonably predicted. These items may include, but are not limited to, share-based compensation expenses. Such information may have a significant, and potentially unpredictable impact on the Company’s future financial results.

#### **Non-GAAP Financial Measures and Key Operating Metrics**

To supplement Global-e’s financial information presented in accordance with generally accepted accounting principles in the United States of America, or GAAP, Global-e considers certain financial measures and key performance metrics that are not prepared in accordance with GAAP including:

- Non-GAAP gross profit, which Global-e defines as gross profit adjusted for amortization of acquired intangibles. Non-GAAP gross margin is calculated as Non-GAAP gross profit divided by revenues
- Adjusted EBITDA, which Global-e defines as operating profit (loss) adjusted for stock-based compensation expenses, depreciation and amortization, commercial agreements amortization, amortization of acquired intangibles, merger related contingent consideration and acquisition related expenses. Adjusted EBITDA is frequently used by analysts, investors and other interested parties to evaluate companies in our industry. We believe that Adjusted EBITDA is an appropriate measure of operating performance because it eliminates the impact of expenses that do not relate directly to the performance of the underlying business.

Global-e uses the Non-GAAP measures in conjunction with GAAP measures as part of Global-e’s overall assessment of its performance, including the preparation of Global-e’s annual operating budget and quarterly forecasts, to evaluate the effectiveness of Global-e’s business strategies, and to communicate with Global-e’s board of directors concerning its financial performance. The Non-GAAP measures are used by our management to understand and evaluate our operating performance and trends.

Global-e’s definition of Non-GAAP measures may differ from the definition used by other companies and therefore comparability may be limited. In addition, other companies may not publish these metrics or similar metrics. Furthermore, these metrics have certain limitations in that they do not include the impact of certain expenses that are reflected in our consolidated statement of operations that are necessary to run our business. Thus, Non -GAAP measures should be considered in addition to, not as substitutes for, or in isolation from, measures prepared in accordance with GAAP.

Global-e also uses Gross Merchandise Value (GMV) as a key operating metric. Gross Merchandise Value or GMV is defined as the combined amount we collect from the shopper and the merchant for all components of a given transaction, including products, duties and taxes and shipping.

For more information on the non-GAAP financial measures, please see the reconciliation tables provided below. The accompanying reconciliation tables have more details on the GAAP financial measures that are most directly comparable to non-GAAP financial measures and the related reconciliations between these financial measures.
